

Discover Global provides supply chain solutions for metal and plastic components and assemblies for various industries.

Discover Global

Discover Global

Helps customers achieve better quality products at lower prices

Welcome to Discover Global™

With offices around the globe, Discover Global has formed an infrastructure to simplify the global sourcing process. Discover Global is a cost effective solution to hiring a specialized staff to help manage your business needs.

Discover Global maintains a full staff of degreed engineers to facilitate product development and full quality control programs. Our team inspects products during manufacturing and before shipment to ensure that our parts meet the prints and quality standards you require. Our staff works with you to ensure our development process meets your project goals!

Full Service Product Development

We provide full scale product innovation and development, including: strategy, design, engineering, prototyping, materials research, and tech development. Some of the world's most respected companies consider us a trusted partner.

Cost-Effective High Quality Manufacturing

Our manufacturing services combine rigorous engineering and quality control with aggressive sourcing. We are continuously saving our clients hundreds of thousands of dollars by providing better quality manufactured products at lower prices.

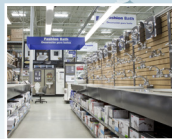

Innovative Solutions for Logistics & Warehousing

We've partnered with the best logistics providers for innovative solutions that help plan strategies, improve customer service and speed order cycle times – all while reducing costs in transportation, inventory storage and order fulfillment.

Benefits of working with Discover Global™

- ❖ Immediate cost savings and a sustainable competitive advantage.
- ❖ Improve margins and customer service through efficient supply chain coordination.
- ❖ ISO 9001:2008 certified with quality program to meet your high standards.
- ❖ Respond quickly to changes in supply and demand, and lower costs by reducing inventory.
- ❖ Detailed and innovative assistance in developing products.
- ❖ Total landed cost to your door, freeing up your resources.

INDUSTRIES SERVED

Products:

❖ Metal Castings

Investment, sand, gray iron, lost wax, high pressure, gravity, stainless steel, zinc, bronze, aluminum.

❖ Compression Moldings

Components such as gaskets, seals, o-rings, grommets, shock absorbers, dampers, handles, belts, key pads, etc.

❖ Extrusions

Main alloys are 6061 and 6063, but we offer a wide variety of other alloys.

❖ Fabrications

Welded, stamped, forged, polished, cast, assembled, etc.

❖ Finished Goods

We manage the whole development process from prototyping, manufacturing, assembly, packaging to getting the goods to our customer's door.

❖ Forgings

Impression die, cold, open die, seamless rolled rings.

❖ Injection Molding

Rubber, precision and large plastic molding, significant tooling savings.

❖ Packaging

Customized packaging solution for your products.

❖ Powder-Sintered Metal

Iron, carbon steel, copper, stainless steel, bronze, etc.

❖ Precision Machining

CNC simple and complex turned and milled shapes.

❖ Stamping

Metal stamping punch presses available ranging in size from 10 to 500 tons that produce simple and complex shapes.

❖ Surface Treatment

Bead blasting, polishing, grinding, heat treatment, annealing, tempering, quenching, electrolyzed polishing, electro plating, hard anodizing, oxide, etc.

❖ Tooling

Cost-effective custom mold and tooling design, multi-cavity, unscrewing, closure, hot-runner, stack molds.

❖ Tubing

Aluminum, stainless steel and copper tubing.
